Binding on Associate Members of the WORLD TRADE POINT FEDERATION

Associate Membership in the WORLD TRADE POINT FEDERATION is automatically bestowed on all e-TradeDesks set up in accordance with the established guidelines, fully meeting the criteria set forth in the founding documents of the Federation and all subsequent amendments to the same, and having achieved functional status.

Until such time as they become Associated Members, e-TradeDesks equally bound by the Code of Conduct of the WTPF.

In becoming a functional or associate member of the WORLD TRADE POINT FEDERATION each individual e-TRADE DESK assumes a public responsibility towards the international business community and automatically takes on a commitment to adopt ethical practices in conducting its business and in all its relations with other associate e-TradeDesk and TRADE POINT members and their client companies.

e-TradeDesks recognize that ethical values are an underlying principle of the Federation; that ethics comes before and above business; that in pursuance of their commercial activities, equality of opportunity and of economic well-being is to be sought; that their professional and business conduct and actions have a substantial impact on the life of the institutions and the community in which they develop their activities; that it is important to avoid the appearance of improper conduct; and that they are solemnly committed not only to run their own e-TradeDesk in accordance with the mentioned ethical principles, norms and rules, but also to require that their professional and business colleagues and clients consider themselves similarly bound by the same exigencies.

ANNEX II

TERMS AND CONDITIONS FOR THE ESTABLISHMENT OF AN e-TRADE DESK AND ASSOCIATE MEMBERSHIP IN THE WORLD TRADE POINT FEDERATION (WTPF)

e-Trade Desk Essentials

e-TradeDesks form part of a unique business network providing them with enormous potential for helping business communities the world over to really gain from international trade opportunities. There is no other worldwide trade facilitating organization able to combine a trusted international ecosystem built on business data certified by a global network of prestigious institutions and local government authorities and trade-leads platform with a high visibility at global level, a multiplicity of online tools and local offices in so many countries. Every effort should be made to take advantage of this uniqueness and to build on it by consolidating participation in the e-TradeDesk Network and all that this entails.

As Associate Members of the World Trade Point Federation (WTPF), e-TradeDesks have the right to expect central level support and advice and to access new tools as they are developed by the Federation. However, the careful process of establishing an e-Trad Desk, guided by terms and conditions agreed upon by the WTPF General Assembly, also places responsibilities on e-TradeDesks. For WTPF strategy to be fully and successfully implemented for the benefit of e-TradeDesks and their client companies, it is essential that each e-TradeDesk honour its commitments. Living up to the business expectations created by the branding policy of WTPF means that e-TradeDesks have to take it upon themselves to add value to the website so it becomes the dynamic and information-packed platform it promises to be; consolidate the network by interacting on a frequent basis with other e-TradeDesks and Trade Points; and routinely ensure the continued validity and viability of the services they offer.

The WTPF has entered into binding agreements with other international organizations and with individual governments on behalf of its e-TradeDesks and Trade Points. Only accompanied by the responsible and determined effort of its members can these commitments be honored.

The remainder of this document outlines:

- e-TradeDesk responsibilities
- e-TradeDesk rights
- Necessary steps for achieving functional status and thus acquiring the right to participate at the WTPF General Assembly, annual and/or regional meetings (e-Trade Desks do not have the right to vote).
- How to maintain functional status.

e- TRADE DESK Responsibilities

WTPF policy stipulates that all e-TradeDesks must:

- ✓ Operate on the basis of a current and viable Action Plan
- ✓ Offer at the very least a minimum set of standard services (see guidelines for establishing an e-TradeDesk)
- ✓ Participate actively in the e-TradeDesk Network and reply to queries from other e-TradeDesks and Trade Points in an appropriate and timely manner
- ✓ Keep updated their profile information and send them in a timely manner to WTPF
- ✓ Respect the branding regulations (see Branding Guidelines) regarding logos and marketing material
- ✓ Constantly deliver together with the WTPF eTradeID to companies
- ✓ Routinely load trade leads into the ETO trust System
- ✓ Maintain in the hosting institution/entity website the official e-TradeDesk banner with the link to the WTPF website. WTPF will also establish a link with the hosting institution in its webpage.

The concept of networking is to be underlined here: *it should not be forgotten that the foundations of the Trade Point Programme rest on the idea of interconnected trade facilitating and trade information entities mutually strengthening one another through a common platform where all participants contribute to the accumulation and dissemination of trade-relevant material.*

e-Trade Desk Rights

All e-Trade Desks have the right:

- ✓ To receive appropriate documentation on the process of setting up the e-TradeDesk
- ✓ To receive information on the preparation of the e-TradeDesk's Action Plan
- ✓ To receive any marketing material produced by the WTPF
- ✓ To attend the Annual General Assembly meetings, annual and/or regional meetings, with voice but not vote
- ✓ To participate in WTPF training activities
- ✓ To benefit from WTPF investment in the technology of the WTPF website and platform
- ✓ To access the current password restricted areas of the WTPF website

Functional e-TradeDesks additionally have the right:

- ✓ To access further value-added, web-based services and tools to be developed at central level.

To make the essentials of being an e-TradeDesk quite clear, the following pages give a brief overview of **How to achieve functional status** and perhaps even more important, **How to maintain functional status**.

HOW TO ACHIEVE FUNCTIONAL STATUS

e-TradeDesk should be aware of and familiar with the guidelines for establishing an e-TradeDesk (accessible in pdf format in the backend and also on the frontend of the website and consisting of the following documents):

- ✓ Institutional information on the WTPF
- ✓ Checklist of Pre-conditions for Setting up an e-TradeDesk
- ✓ Work Plan for Setting up an e-TradeDesk
- ✓ Guides 1-5 providing specific information in line with the Work Plan

These guidelines are not just a series of formalities. A lot of work went into their preparation and each step of the work plan has its logic. The key elements in the work plan for setting up an e-TradeDesk and becoming operational are as follows:

The letter of request

The first step in the process is the letter of request from a body/entity accompanied by a Background Document.

Why is this so important?

- The WTPF needs a **viable counterpart** to work with in setting up an e-TradeDesk
- In this way the WTPF knows right from the outset that the project to set up an e-Trade Desk has **full commitment from the hosting entity** to the e-TradeDesk philosophy

The letter of request to establish an e-TradeDesk must be accompanied by a brief **Background Document** summarizing how the potential e-TradeDesk plans to deal with the points raised in the **Checklist of Pre-conditions for Setting up an e-TradeDesk** mentioned above.

A word on the area of coverage of e-TradeDesks:

e-TradeDesk area of coverage is neither exclusive nor limited: WTPF may allow the establishment of further e-TradeDesks within the same city/region/country/sector/business community where an e-TradeDesk already exists.

The legal framework of the e-TradeDesk

The guidelines concerning the legal framework of the e-TradeDesk are aimed at ensuring that the e-TradeDesk will be set up as non-profit activity, will respect the philosophy and norms of the Trade Point Programme for e-TradeDesk network, and will have a legal identity clearly establishing the basis on which it will function within the host entity.

Why is the legal framework of the e-TradeDesk so fundamental?

- So the e-TradeDesk can start functioning on a clear and sound legal footing, adding prestige to the entity/institution
- To vouch for the effectiveness and durability of the e-TradeDesk

The lack of an adequate legal framework puts the very existence of the e-TradeDesk in jeopardy in the face of changing local conditions, political or otherwise, and also diminishes its chances of securing a budget.

Signature of the “Terms & Conditions for the Establishment of an e-TradeDesk and Associate Membership in the World Trade Point Federation”

The **Terms & Conditions** document is sent for signature to the hosting entity setting up the e-TradeDesk as soon as all the prerequisites for embarking on the establishment of an e-TradeDesk have been complied with. It constitutes the formal and legally binding agreement signed between the WTPF and the hosting entity, laying down obligations and responsibilities for both parts.

Why is signature of the Terms & Conditions document important?

- Signature of the **Terms & Conditions** document by both parties is a guarantee to WTPF that the original objectives defined by UNCTAD at the outset of the Trade Point Programme will be honored and pursued.
- It is a guarantee to WTPF that individual e-TradeDesks will adhere to these objectives and to WTPF policy.
- It is a guarantee to e-TradeDesks that WTPF will carry out its responsibilities
- It is an assurance for all parties that the Trade Point Programme will be sustained over time and implemented in line with legally binding provisions.

The Action Plan

WTPF recognizes the vast differences in local conditions around the world and therefore the need to allow for diversity of e-TradeDesk structure and operating practices. There is no one model to fit all circumstances, and it is this very need for flexibility that makes it all the more necessary for e-TradeDesks to develop an Action Plan explaining just how they plan to proceed at the local level, mold their services to local requirements, and remain economically viable.

WTPF can provide centralized services and develop tools to help e-TradeDesks carry out their operations, but it is up to e-TradeDesks themselves to work on local solutions, to carve out their market niche, to ensure their financial sustainability, and to contribute to the functioning of the e-TradeDesk Network as a whole. This is done through the Action Plan.

Why is the Action Plan important?

The Action Plan is the analytical tool enabling the e-TradeDesk to:

- ✓ assess local market conditions
- ✓ establish clear objectives
- ✓ define a well-targeted customer base
- ✓ design a realistic marketing strategy
- ✓ create a viable services structure or source the necessary information

Creating the link between host entity/organization/e-TradeDesk website and WTPF website

Inserting the e-TradeDesk banner into the host institution website is a resource that enables e-TradeDesks to link their host institution website to the WTPF website and to convey their local panorama for potential buyers / sellers / investors from other countries. It is a unique opportunity for the local to become global and is well worth the effort to exploit all of its facets and features.

Deliver together with the WTPF the ETradeIDs to companies

Why is it important the eTradeID?

- the eTradeID is a showcase to promote companies within a trusted ecosystem and not only on a simply normal website
- assigning eTradeID to companies expands the “chain of trust” concept

It is fully recognized that the e-TradeDesk's marketing strategy will take time to have an impact, and that it will most likely be impossible to assign the critical mass agreed right at the outset, but **to attain functional status, the e-TradeDesk must show that it is making significant progress in this regard, that it has begun together with WTPF to deliver eTradeID to companies, and that these companies are already feeding the ETO trust System with products/services to offer/demand.**

Implementing the Branding Guidelines

Why is it important to implement the branding strategy of the WTPF not only on the internet but also on e-TradeDesk office stationery, business cards and signs, in all marketing material of the e-TradeDesk and all promotional advertisements in trade- related events etc.;

- The most powerful marketing impact is achieved in unison.
- The use of alternative logos by individual e-Trade Desks detracts from the unified image created by WTPF.
- Failure to use the official branding logos also detracts from the strength of the e-Trade Desk network as a whole.

To be awarded functional status an e-TradeDesk must have fully applied the Branding Guidelines (available in pdf format in the backend of the website) in all the aforementioned contexts.

e-TradeDesks have a period of **six months** after signature of the **“Terms & Conditions...”** to attain functional Status. Once this period has lapsed, the **“Terms & Conditions...”** document becomes invalid. In the eventual case of the continued wish to establish an e-TradeDesk, the procedure must be re-initiated right from Step 1 of the Work Plan.

Summary of Prerequisites for attaining Functional Status

- ✓ Deliver their complete profile information, to be included in the WTPF website under the Status “Feasibility”
- ✓ Submission of a copy of the e-TradeDesk's Action Plan to the WTPF
- ✓ Guarantee the critical mass of eTradeID to be delivered to companies, as established in “Terms & Conditions...”
- ✓ Full compliance with WTPF Branding Guidelines
- ✓ All the above within six months after signing the **“Terms & Conditions...”** document.

HOW TO MAINTAIN FUNCTIONAL STATUS

- ✓ Continued update of their profile information, timely informing the WTPF
- ✓ Continued implementation of the Branding Guidelines and the exclusive display of the official logo on the internet, all printed materials, signs, posters, etc.
- ✓ Submission every year of the membership fee
- ✓ Delivery of eTradeID to companies (a critical mass of companies)
- ✓ Routine posting of ETOs
- ✓ Compliance with the non-profit status of the e-TradeDesk and host entity
- ✓ Compliance with all other aspects of the e-TradeDesk philosophy

Failure to comply with any of the above will lead to withdrawal of functional status by WTPF, and therefore loss of the right participate to General Assembly meetings, annual and/or regional meetings or closure of the e-TradeDesk in the case of flagrant breaches.
